Acknowledgements

Producing a textbook of high quality is a true team effort, requiring the input and expertise of a very large number of people. The authors, editorial team, and publishers of this book would like to convey our sincere thanks to the reviewers listed below who provided crucial analyses of our draft manuscript, and often provided reviews of designed pages. Their assistance was invaluable in helping us develop a text that we hope you will find completely appropriate for your teaching and your students' learning. In addition, the comments from those teachers (and their students!) who took part in the field testing of this material were very helpful and much appreciated. We realize that tackling a new curriculum with a text-in-progress is a big challenge, and we thank you for being up to the task.

We also thank the following writers who researched and prepared the Special Features in *Inquiry into Biology*: Kirsten Craven, Jenna Dunlop, Susan Girvan, Eric Grace, Barbara Hehner, Ann Heide, Lynne Kailan, Denyse O'Leary, George Thomson, and Alexandra Venter. Finally, we thank the talented and dedicated members of the team at Pronk&Associates who did their best no matter what challenges they faced.
