Adding Fractions

$$1) \frac{5}{20} + \frac{3}{4} + \frac{2}{5} = \frac{5}{20} + \frac{15}{20} + \frac{8}{20} = \frac{28}{20} = \frac{7}{5} = 1 \frac{2}{5}$$

$$2) \frac{9}{30} + \frac{2}{15} + \frac{1}{6} = \frac{9}{30} + \frac{4}{30} + \frac{5}{30} = \frac{18}{30} = \frac{3}{5}$$

$$3) \frac{2}{9} + \frac{12}{27} + \frac{8}{27} = \frac{6}{27} + \frac{12}{27} + \frac{8}{27} = \frac{26}{27}$$

$$4) \frac{6}{7} + \frac{1}{21} + \frac{4}{7} = \frac{18}{21} + \frac{1}{21} + \frac{12}{21} = \frac{31}{21} = 1 \frac{10}{21}$$

$$5) \frac{5}{7} + \frac{7}{14} + \frac{4}{7} = \frac{10}{14} + \frac{7}{14} + \frac{8}{14} = \frac{25}{14} = 1 \frac{11}{14}$$

$$6) \frac{2}{4} + \frac{8}{16} + \frac{3}{8} = \frac{8}{16} + \frac{8}{16} + \frac{6}{16} = \frac{22}{16} = \frac{11}{8} = 1 \frac{3}{8}$$

$$7) \frac{11}{26} + \frac{10}{13} + \frac{6}{13} = \frac{11}{26} + \frac{20}{26} + \frac{12}{26} = \frac{43}{26} = 1 \frac{17}{26}$$

$$8) \frac{3}{13} + \frac{10}{26} + \frac{6}{13} = \frac{6}{26} + \frac{10}{26} + \frac{12}{26} = \frac{28}{26} = \frac{14}{13} = 1 \frac{1}{13}$$

$$9) \frac{5}{21} + \frac{4}{7} + \frac{12}{21} = \frac{5}{21} + \frac{12}{21} + \frac{12}{21} = \frac{29}{21} = 1 \frac{8}{21}$$

$$10) \frac{10}{12} + \frac{1}{6} + \frac{2}{4} = \frac{10}{12} + \frac{2}{12} + \frac{6}{12} = \frac{18}{12} = \frac{3}{2} = 1 \frac{1}{2}$$
